

## FIXING YOUR HANDRAIL TO YOUR PLATFORM INFORMATION

To aid in delivery your platform with handrail will come partially flat packed. You will need to attach the handrail to the main platform. All fixings are supplied for this.

Delivered components:

- a) 1 No. Main grating platform section with yellow nosings.
- b) 2 No. Modular handrail sections, approx. 1000mm wide a 1100mm high, yellow.
- c) 16 No. bolts, 32 No. bolt washers and 16 No. nylock nuts, 8 No. large penny washers.

Directions for install:

- 1) Position the handrail sections at the edges of the platform to the side of the yellow nosings.
- 2) Feed the bolts with washers through the 4 holes on each of the base feet through the dedicated predrilled holes on the C channel and through the appropriate holes in the grating.
- 3) For the bolts through the C channel, attach the washer and then the nylock nuts and tighten.
- 4) For the bolts through the grating, put the large penny washers on, so that they bridge the square mesh then attach the washer and the nylock nut and tighten.
- 5) Repeat for all 4 base feet.
- 6) Final check to ensure all nylock nuts are fully tightened.
